

Introducing the

# GRAiT™

S Y S T E M

The GRAiT™ System integrates interactive mapping and plan sets so that your team can do condition assessments, inspections, and even high precision measurements from your smart phone or tablet.

## How does the GRAiT™ System benefit your Organization?

### Empower Delivery

- No more need for grid layout because measurements can be done through integrated high precision measurement devices, such as RTK GPS Rover
- Take plan sets directly into the field allowing intuitive identification of defects with location tagging

### Advance workflows

- Complex reports are automated by seamlessly integrating captured photos, comments, risk ratings, and measurements from your field team.
- Live dashboards and analytics tools allowing your large organization access to entire conditions repository.

### Instant information

- Manage, Maintain, Monitor your entire structure library
- Utilize throughout the full life-cycle; aiding in operations/maintenance, asset management and eventually decommissioning.

- ✕ Simplify complex relationships among different location, assets, and resources
- ✕ Faster processing times, automated reporting and seamless transition of information to various stakeholders accelerating project timelines.
- ✕ Labor cost savings (reduction of up to 65% time per report per bridge), increased productivity, increased efficiency.
- ✕ Gain Transparency, Reduce costs, Improve ROI.
