

Introducing the

GRAiT

S Y S T E M

The GRAiT™ System integrates interactive mapping and your Airport's inspections instantly from your smart phone or tablet; keeping you industry compliant and giving you the power to make better decisions faster.

How does the GRAiT™ System benefit your airport?

Streamline processes

- Part 139 operations in centralized location
- Enhance your existing asset management, facilities, and CMMS systems
- Reduce costs, Improve ROI

Improve workflows

- Replace manual paper forms
- Save time by easy use of mobile devices for data collection
- Streamline inspections inventory and attendance tracking

Instant information

- Manage, maintain, monitor all assets and workflows
- Locate, track, inspect

- ✕ Simplify complex relationships among different locations, assets, and resources but gather richer data (photos, notes, automated history, etc.)
- ✕ Create and store Part 139 checklists, real-time statuses, risk ratings and access important documents directly from the field
- ✕ Integrate maps, floor plans, and containers to locate, navigate, and alert associates
- ✕ Provide relevant information based on role within organization, location and current task
